

Key Scottish White Fish Landings.

Notes on the profiles and landings information supplied in these graphs.

All the 2016 profiles are based on historical total landings into Scottish ports for each species, averaged for the last three years.

The landings profiles and the actual landings recorded each month relate to Scottish Producer Organisations only.

NB: Therefore these graphs do not include other UK or foreign vessel landings into Scotland.

Landings are shown for each species into ALL Scottish ports. NB: Landings into port are not necessarily fish sold through the fish market.

The Scottish PO profiles may change by small amounts over the year as quota allocation changes are made on a month by month basis.

These graphs are compiled using **provisional landings & price data** taken monthly from the Marine Scotland website:

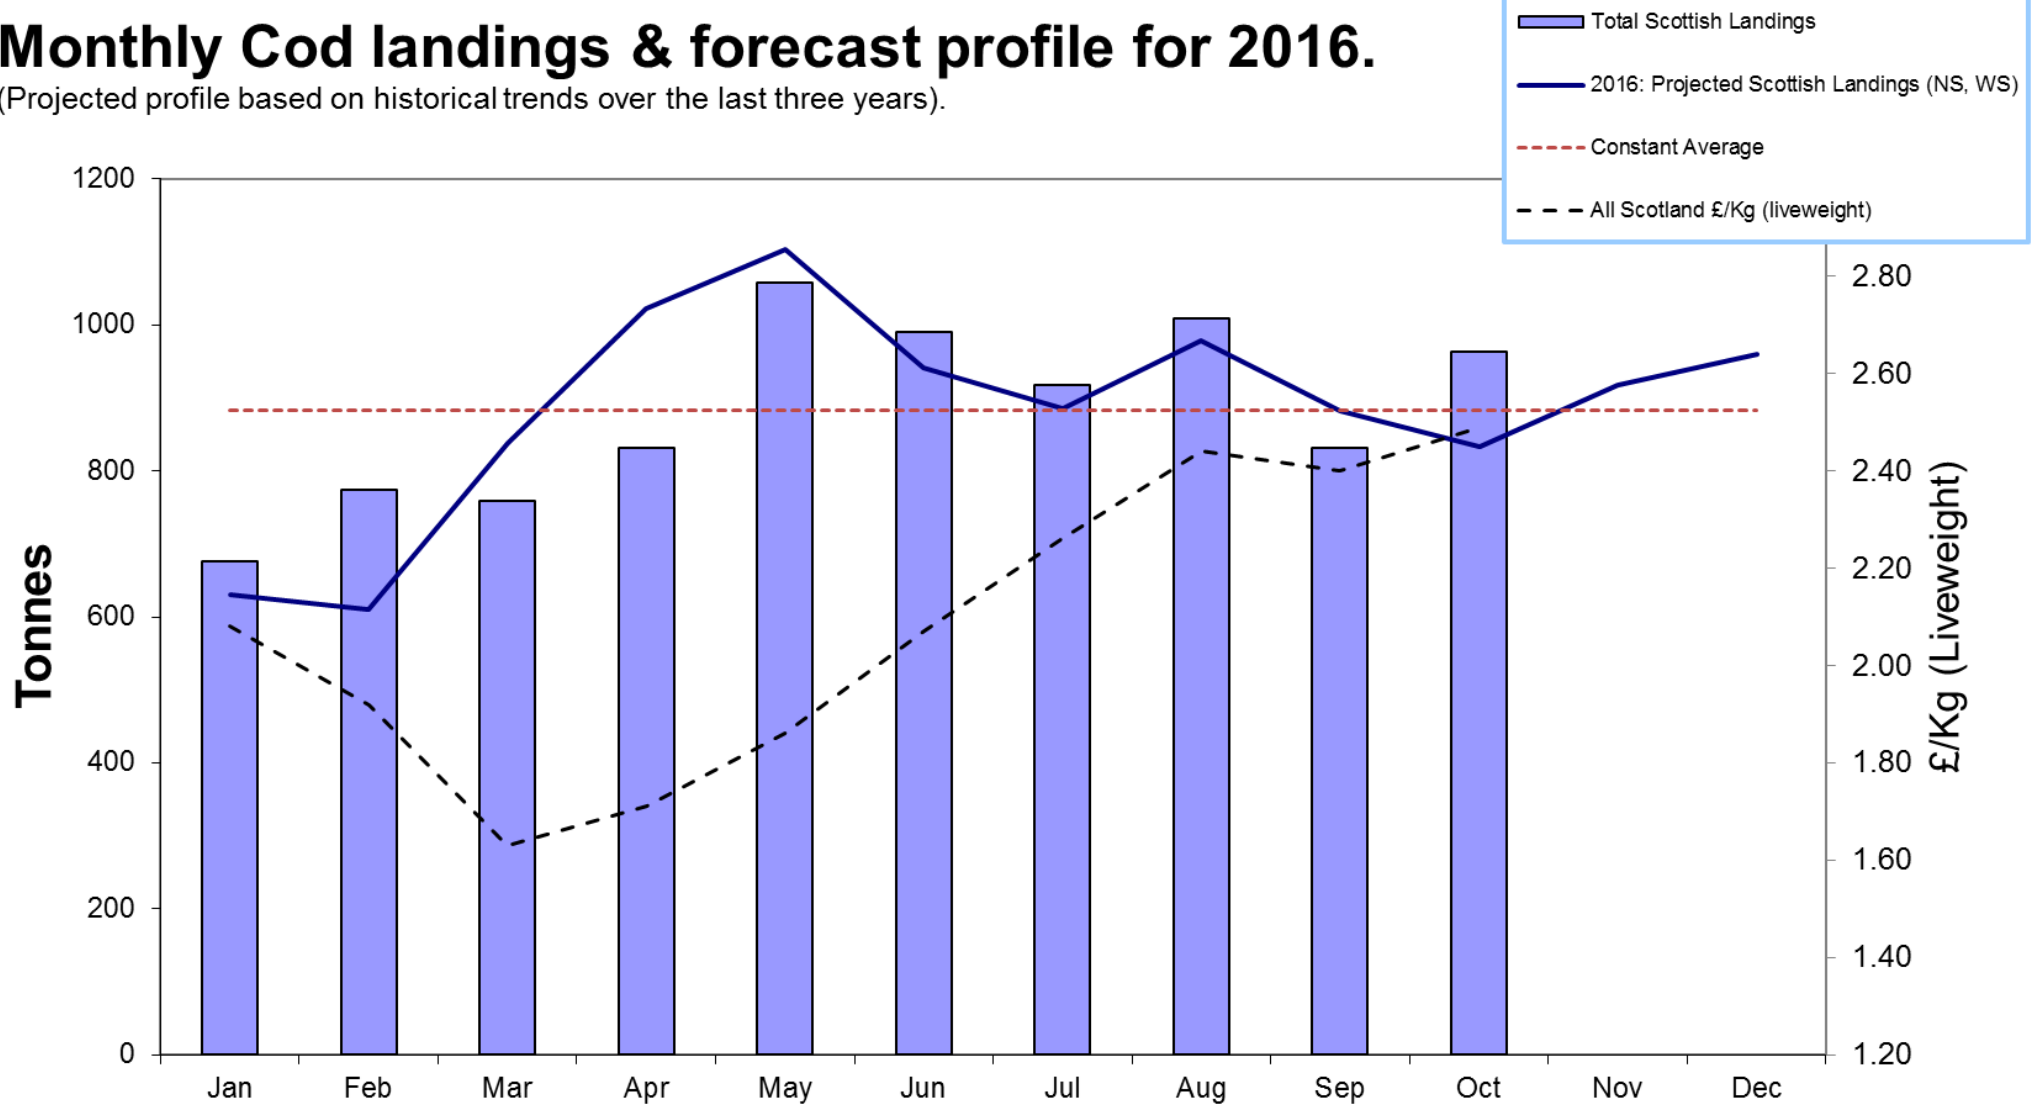

<http://www.scotland.gov.uk/Topics/Statistics/Browse/Agriculture-Fisheries/Seafisheriesdata/LandingsIntoScottishPorts>

NB: Graphs project current quota allocations as at 30th November 2016. Annual allocations will be revised during following months.

Landings for October are not complete at the time of analysis. Adjustments will be made next month

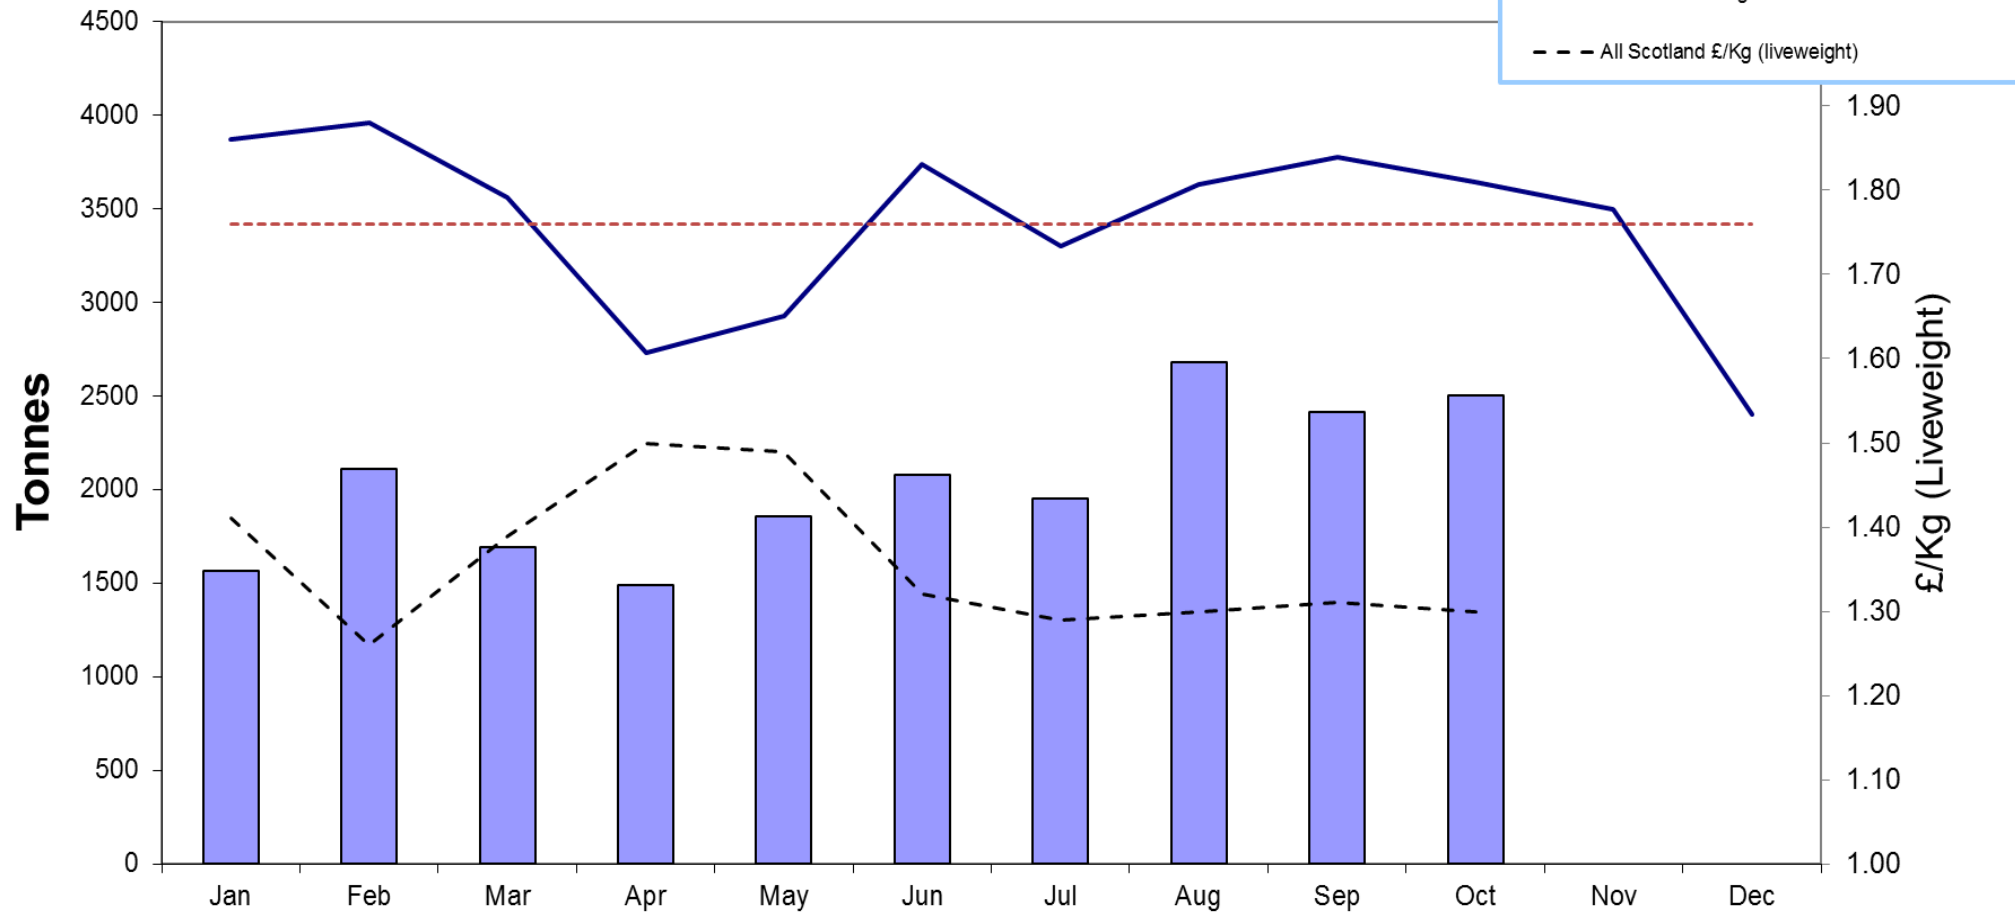

Monthly Cod landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).

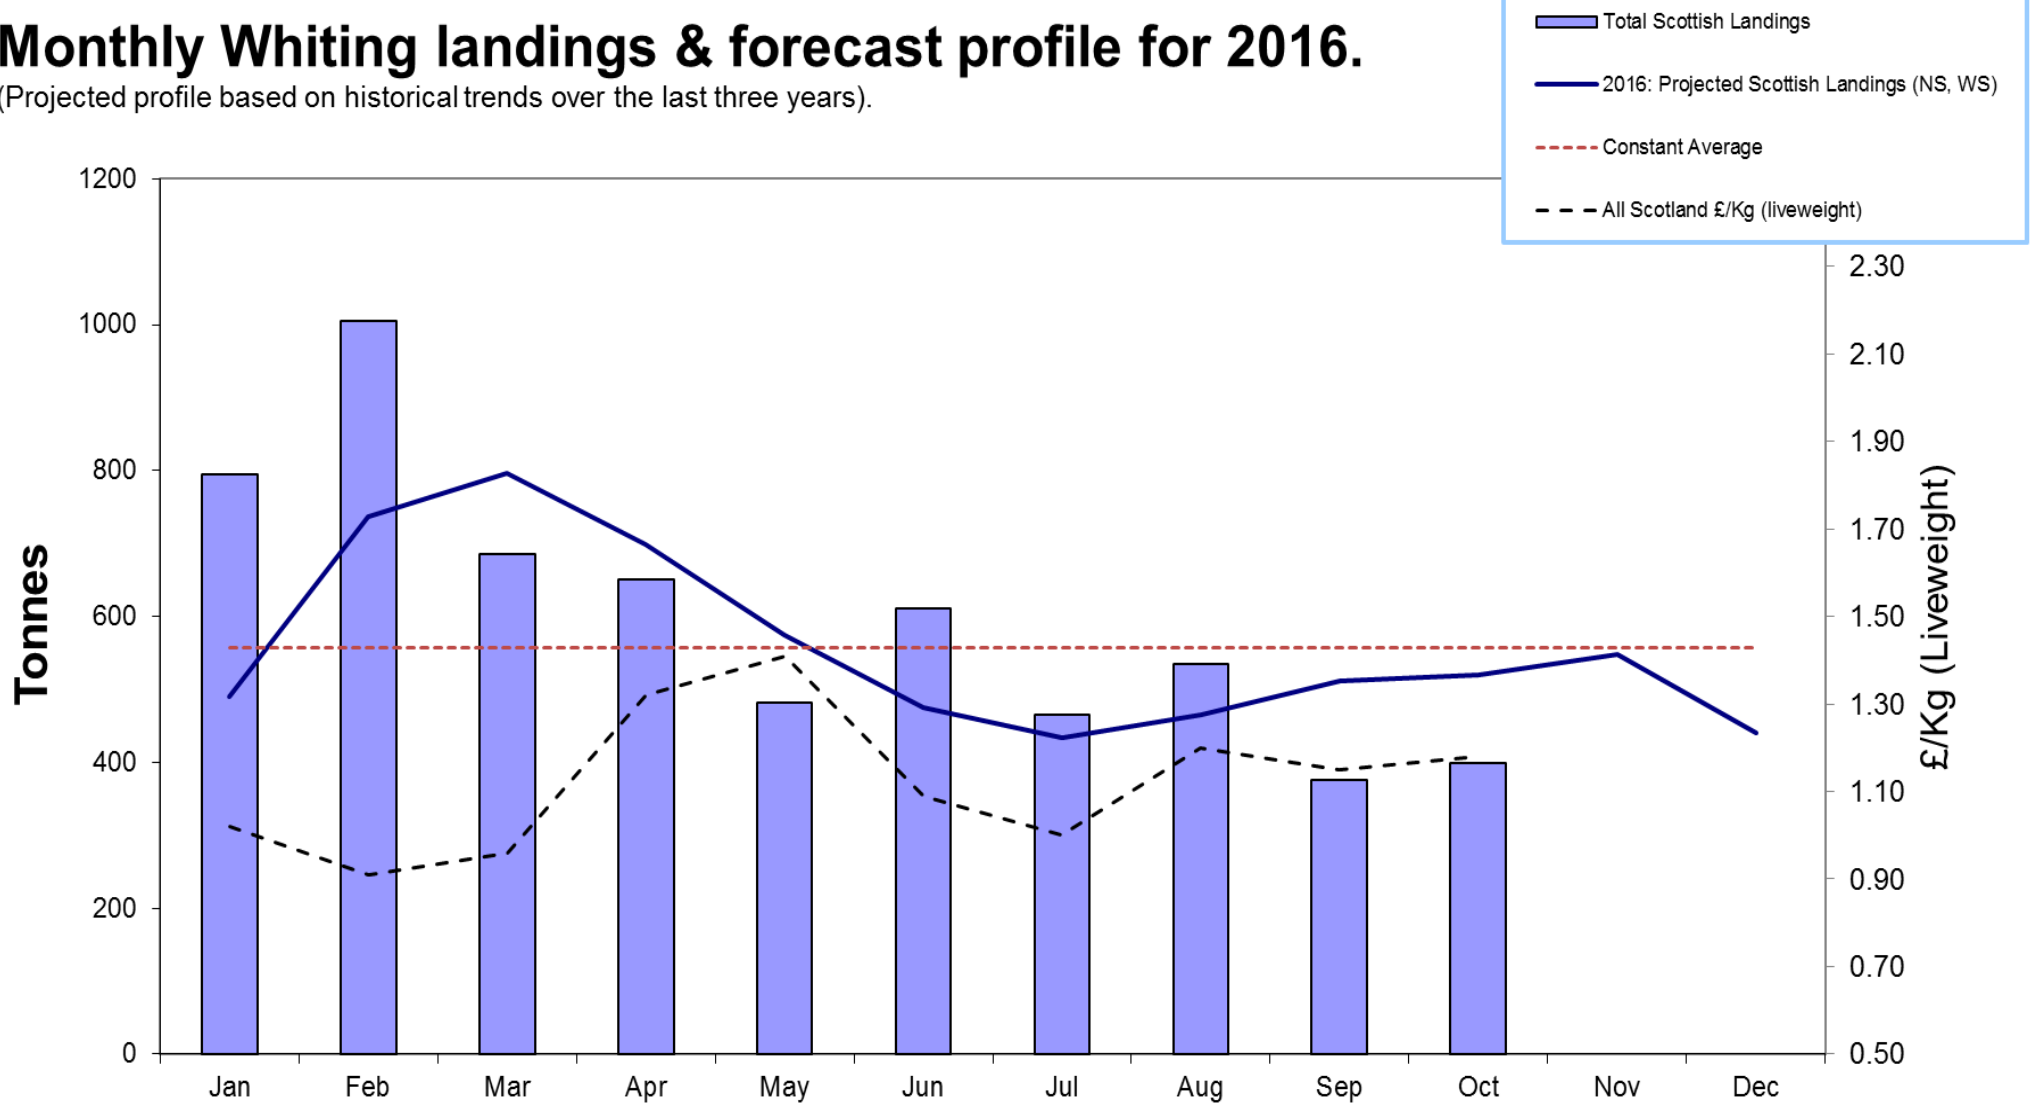

Monthly haddock landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).

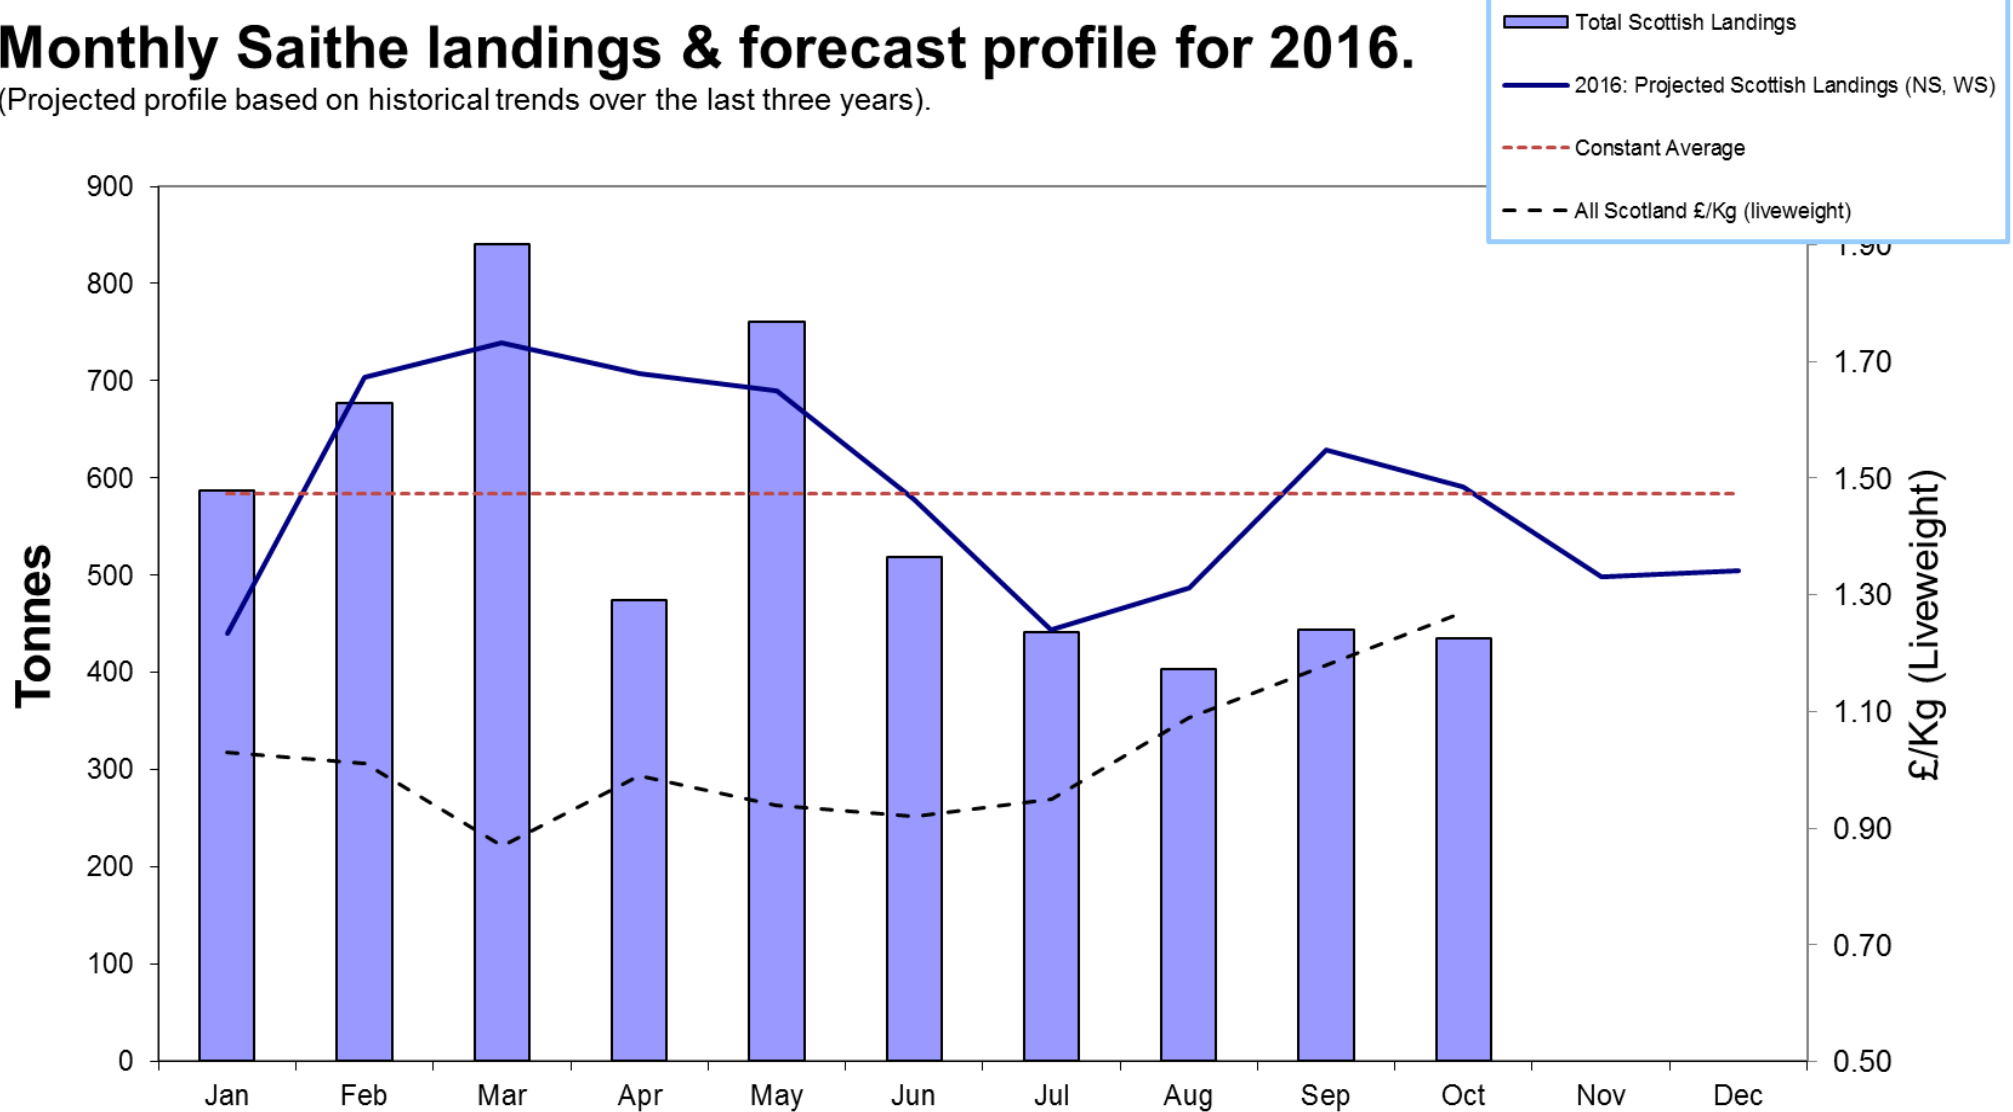

Monthly Whiting landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).

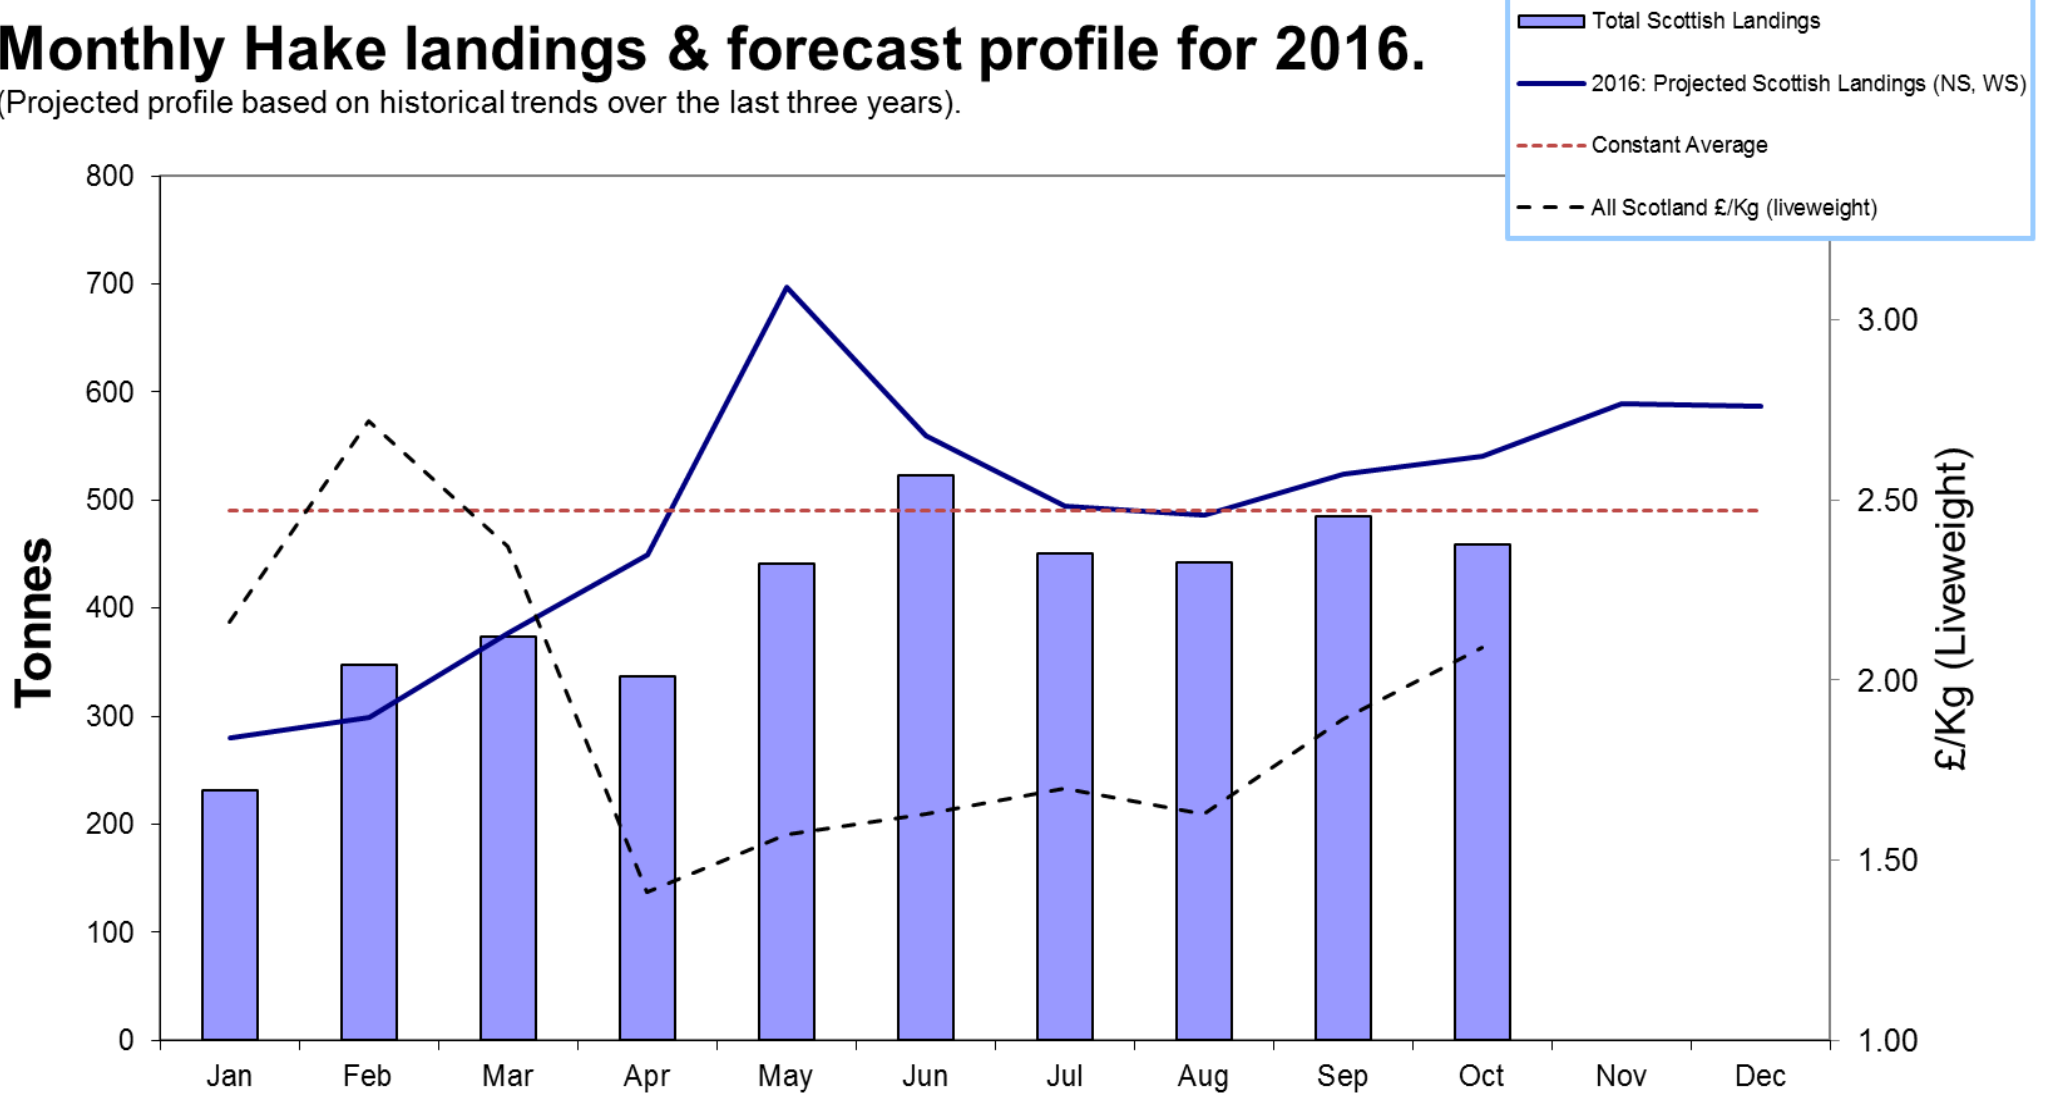

Monthly Saithe landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).

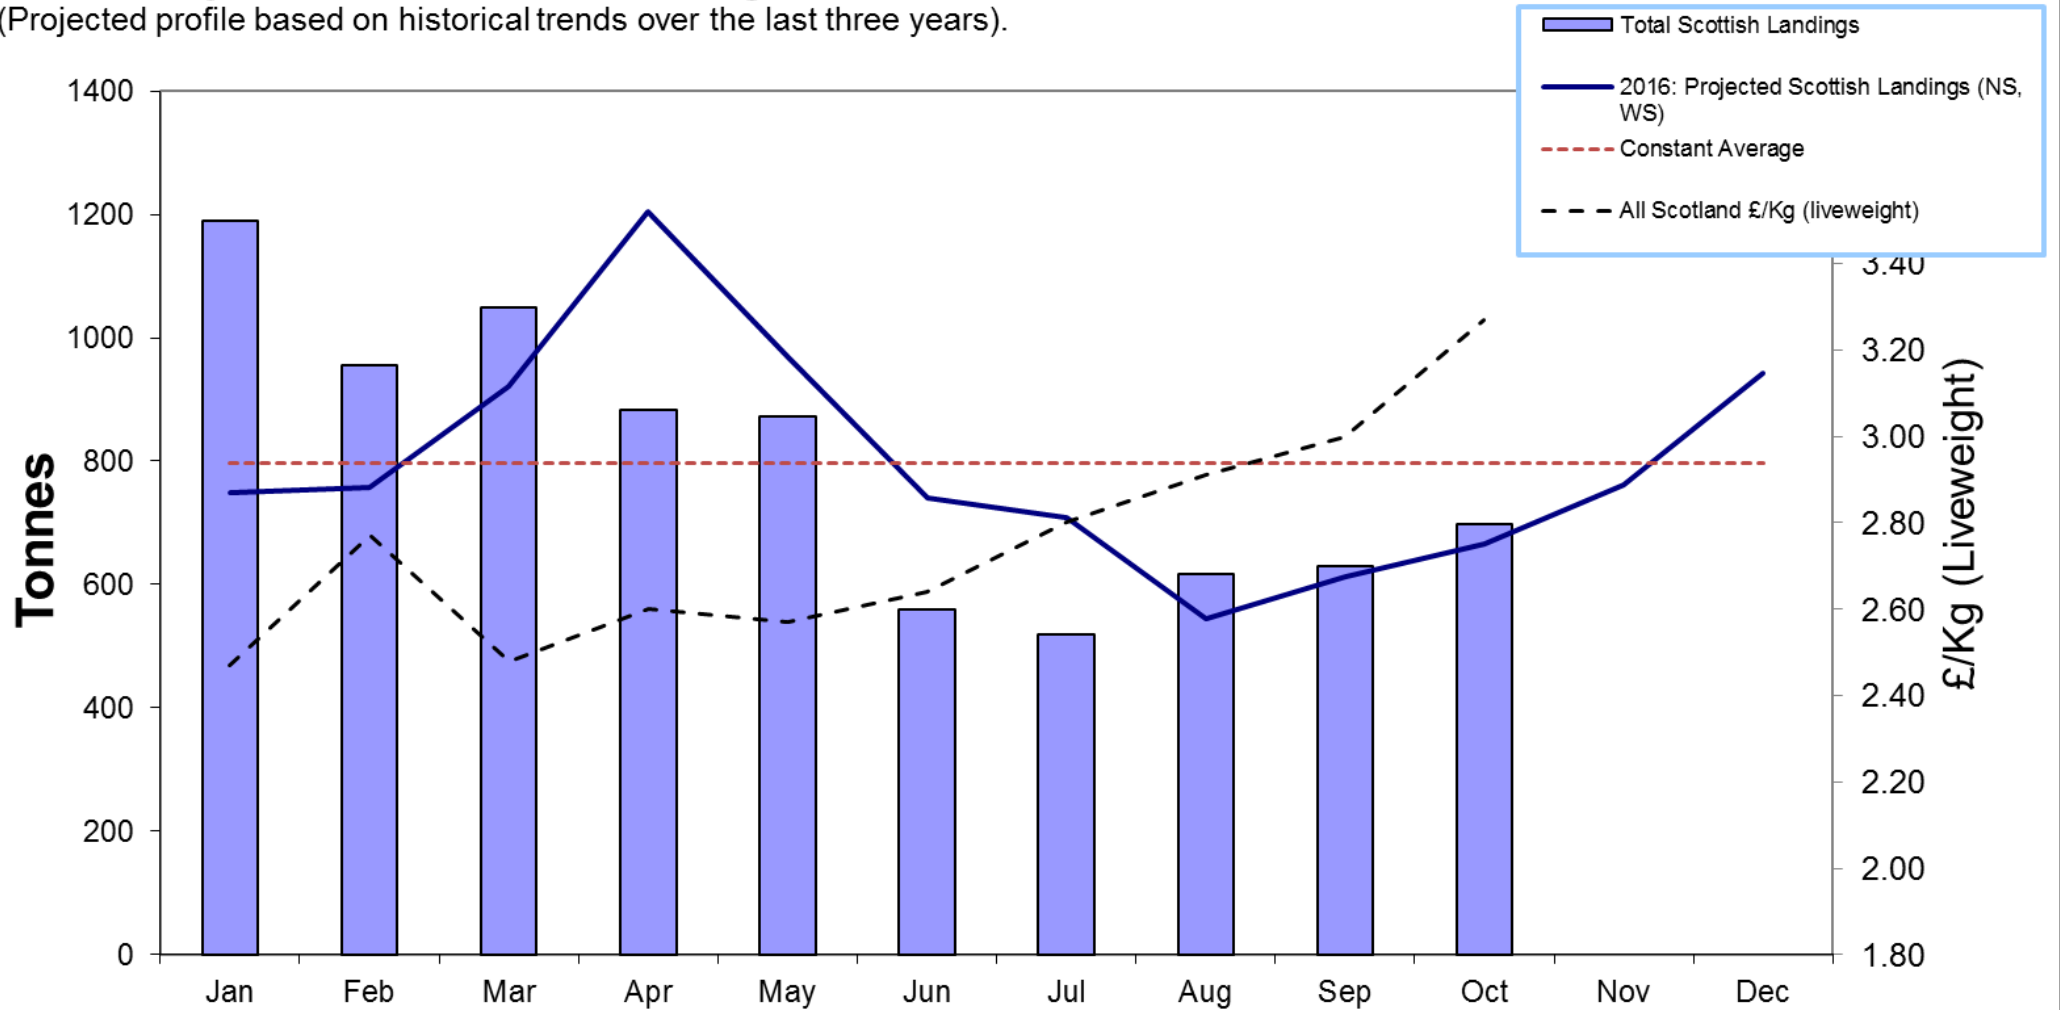

Monthly Hake landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).

Monthly Monkfish landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).

Monthly Megrim landings & forecast profile for 2016.

(Projected profile based on historical trends over the last three years).
